day's events.

The order was issued on Friday, it was said, merely as a routine military precaution in view of the fact that the Dail Eireann was meeting to-day and that it might reject the terms. Almost three-quarters of the military strength had received leave during the ruce, with only a skeleton organization left in most places, and the action of recalling the men on leave is officially described as more of a military which does not involve a republic. ficially described as more of a military precaution than political action based upon probabilities.

There is no other interpretation that can be placed on De Valera's speech, however, except that Great Britain has not yet gone far enough along the path of recognizing Irish nationhood. Every element that the day's atmosphere sustained threw into strong outline this phase of the Irish position. The entire tone of De Valera's speech was that Ireland could accept nothing from Great Britain's generosity, but must receive the right of self determination.

Whether the Sinn Feln has outlined whether the Sinn Pein has outlined that "other way" or some Sorm of in-dependence within the Empire remains a closely guarded secret. It is known what they object to is that Lloyd George's terms impose as a condition the control of ports and airways, which the control of ports and airways, which the Sinn Fein says would induce any real dominion to secode from the Empire in five minutes, General Smuts to the contrary notwithstanding. In fact they are deeply anary both with General Smuts and Premier Lloyd George; with the former for describing the scheme as being as good as that accorded to South Africa and the latter for publishing it before the terms had been made public. The Shm Fein assert that this was in direct violation of a mutual understanding not to publish anything before Monday.

But the chief hopeful element remains fact that their anger is directed nore against the form than the sub-trance of these things. They say that when the private sessions of the Dail Eireann begin a milder spirit among the Sinn Fein and a milder spirit among the Sinn Fein and a milder spirit among many important people in Dublin will begin to be feit and the way will be prepared for some concession that will satisfy British imperial pride. It was anything but an imperial pride session that opened to-day. It was an atmosphere of past glories grown rusty. In an Irish drizzle thousands forming a typical Dublin crowd gathered to watch the members of the Dail Eireann and their guests gather. The Irish "army" stood in trim formation despite the non-descript civilian garb, distinguished only by a green badge worn on the breast. Within the Mansion House the round room was particularly reminiscent of reom was particularly reminiscent of faded and even tragic memories.

DUBLIN. Aug. 16.—The address of Mr. De Valera before the Dall Elreann to-day was listened to attentively by the 126 members gathered from all parts of Ireland. It was delivered after Prof. John M. Together with credit to the Bolsheviki for famine ald through the Inter-Allied Credits Association it is expected the conference will take place Saturday, either at Riga or Reval. It is said the proposal gives greater control to the Soviets in relief distribution than Mr. Hoover's plans contemplate.

Litvinoff declared this offer would not affect American ald as Russia could accept both as well as the help of many more organizations.

The denationalization of real estate in Soviet Russia, through a decree authorizing former owners or other persons to buy houses and land from the Government, is announced in a Moscow despatch to the Rosta Agency, the official Soviet news disseminator. The Prime Minister summarized the events leading to the position in Asia Minor, saying: "There is danger of anarchy and its consequences in these various areas. France occupied Cilicia anarchy and its consequences in these various areas. France occupied Cilicia with a view largely to protect the Armenian population, the Italians occupied Southern Anatolia for the same purpose, the Greeks were invited by the Supreme Council to control to the same purpose. the Greeks were invited by the Supreme Council to occupy Smyrna and Thrace.
"If any part of these territories had been assigned to us for protection it would have cost us scores of millions."
He then reviewed the history following the treaty of Sevres and said the events showed that former Premier Venizelos was right in thinking that he could have disposed of the insurrection, but that the Aliles attempted mediation which failed and it became necessary to let them fight it out.

which failed and it became necessary to let them fight it out.

"War has one merit in that it teaches respect for facts," he said, "and I think that both of these races [the Greeks and Turks] will be easier to deal with when their oyn limitations have been brought thoroughly and clearly to their minds, which will be soon. The time for mediation has not arrived. When it does, I have no doubt that Sevres will have to be considered.

"I hope the Greeks won't make the mistake they nearly made in 1913 when after a series of brilliant victories they insisted on exaggerated terms and put forward extravagant claims which raised a host of enemies. Moderation in victory is no less important than the victory itself. I go beyond that and think that moderation is more important than the victory, for there are many tragedies written across the page of history which have arisen from victory turned to bad use. Therefore I must entreat Greek statesmanship not to put the Greek slaims too high."
